

Governmental Accounting Support

Efficient Compliance

Our extensive understanding of the government sector helps us minimize any deficiencies that can lead to inaccurate or incomplete accounting records. We help governmental agencies become “audit ready” and have the proper books for their external auditor. This enables our clients to improve the accuracy of their records and the financial reporting process.

Let Us Help You Navigate

In today's challenging marketplace, many companies have broadened their customer base to include the nation's largest customer – the United States government. In doing so, however, these companies are subject to various complex regulations set forth by various contracting agencies.

Experience Matters

Wessel & Co. has the experience and resources to provide extensive services for the state and local governmental sector. Our governmental experience reaches beyond audit and accounting. We act as consultants to a variety of local governmental units and assist with bond issues, cost analysis and advisory engagements. Our size and depth of experience translate into a very real advantage. Our team provides highly qualified, knowledgeable guidance on issues unique to this sector.

The Next Step

Take the first step and call our office at (814) 536-7864 to see what our firm can do for you.
